

Welcome to West Shore School District's Curriculum Site. We are in the process of reviewing and revising our entire curriculum so you will see a mix of new modules and older LFS (Learning Focused Schools) maps. We utilize a modified UbD (Understanding by Design) module format with elements of Learning Focused School components. Our modules include student-friendly I can statements so it clear what they need to learn and apply.

Best practices, lesson plan formats, and more are found in the document library. The modules have links to these pages as

well. We also have a textbook on-line resource tab so you can see what is available with the textbooks you utilize.

Our goal is to complete the remaining modules this school year and then begin to load model learning plans for each module. The site is always a work in progress as we are committed to a growth mindset across our district. We continually review and revise our curriculum based on teacher feedback, research, data review and current best practices.

Our public facing website contains a lot of resources for you as well. Visit the curriculum department to access these. As always, if you have any questions, concerns or ideas feel free to contact me or any of your administrators.

Wishing you a successful year,

Jamie Whye
